

Simple Stars tutorial

Description: Some people have asked how I made the stars background in some of the planets tutorials, so this tutorial, i'll show a simple way to create stars. Im not claiming this technique will create anything realistic, just something simple that looks like stars.

Start a new document whatever size you want

- Create a new layer and fill it with black.
- Then go to **Filter->Noise->Add Noise**.

Set: **Amount:** 20**Distribution:** Gaussian **Monochromatic:** Checked

Note: The more "Amount" you set, the more stars where will be

Duplicate this layer and set it to: **Overlay**.
Thats it.
